A4 appendix. The internal brand for Group 28's Certacito.ai, used across the product UI, documents and presentations since A1.

1. Brand core

- Name:** Certacito.ai - from Latin *certus* (certain) + *cito* (swiftly).
Certainty about your AI, fast.
- Tagline:** *Governed. Auditable. Transparent.*
- Voice:** calm, factual, compliance-grade. We write like an auditor, not like a startup pitch. Numbers over adjectives. No exclamation marks in product copy.
- Logo:** shield-check mark (see `frontend/src/imports/certacito_logo.png`).
Wordmark is always lowercase `certacito` with `.ai` in teal.

2. Colour system

One job per colour. A colour never doubles up on meanings.

ROLE	NAME	HEX	JOB
Primary	Navy	#1B3A6B	Structure: sidebar, headings, primary buttons. Trust.
Accent	Teal	#0D7377	Active states, links, PERMIT accents, focus rings.
Alert	Red	#C0392B	Critical risk, DENY, destructive actions. Nothing else.
Positive	Green	#27AE60	PERMIT badges, healthy status, compliance pass.
Warning	Amber	#E67E22	Medium/High risk, ESCALATE, SLA warnings. The only amber used in the interface.
Chart	Gold	#F39C12	Fourth chart series only. Never used for risk or status, so it cannot be confused with ESCALATE.
Canvas	Grey	#F4F6F9	Page background behind white cards.
Ink	Dark navy	#1A1A2E	Body text.

Chart series order: green, teal, navy, gold, red (`--chart-1..5` in `frontend/src/styles/theme.css` - the CSS variables are the source of truth).

Accessibility rule (WCAG 2.1 AA): risk and outcome are never colour-only.

Every badge pairs its colour with a text label; contrast is verified against the navy/white palette.

3. Typography

USE	A3 SPEC	SHIPPED IN A4	NOTE
UI text	Inter	Arial (system)	Licensing-free, zero font loading on marker machines.
System identifiers	JetBrains Mono	Courier New (system)	Rule IDs, hashes, payloads, timestamps - anything the machine wrote.

The intent carried over: prose in the sans face, machine identifiers in monospace,

so an operator can separate the two at a glance. Weights: 700 for headings and KPIs, 400 for body.

4. Layout and components

- Persistent navy sidebar (220 px) with grouped nav (MAIN / GOVERNANCE / REPORTING) and the live policy-engine health strip pinned at the bottom.
- Breadcrumb header per screen: CERTACITO.AI / SECTION / SCREEN in letter-spaced 10-11 px caps.
- Content = white cards on the grey canvas, 1 px `rgba(27, 58, 107, 0.08)` borders, 6-8 px radii. No drop-shadow soup.
- Badges: pill, 10-11 px bold caps, tinted background of their semantic colour.
- Tables: 10 px letter-spaced grey column headers, expandable detail rows.
- Dark payload panels (`#0F172A`) for masked payloads - terminal look separates "evidence" from UI chrome, masked fields highlighted red.

5. Document and presentation branding

- Documents: navy H1/H2 with a thin navy rule, teal for sub-accents, the header strip CERTACITO.AI | <doc name> | Group 28 | CSIT321 and the UOW footer (see A1/A3 templates).
- Slides: title in navy on white, or white on navy for section breaks; teal accent bar; same badge language as the product when showing outcomes.
- Always the group name **Group 28** and the tagline on the title page.
